PREFACE

This report presents tables dealing with the subject of literacy, and forms part of a series giving final population figures from the 1945 Census of Newfoundland. The tables herein show the population 10 years of age and over classified as to the number who can read and write, can read only, or cannot read or write. Previous reports in this series presented data for all districts, towns and settlements by each of the following classifications in turn: sex; age groups; religious denominations; and marital status (including classifications of marital status by age groups). Later reports will show information by districts for such subjects as ethnic origin, birthplace, schooling, etc.

Tables 24, 25 and 26 of this report give comparative figures on literacy and sex for the Censuses of 1945 and 1935, the first for Newfoundland as a whole, the second for census districts, and the third for towns and settlements of 1,000 population and over. Table 27 presents figures on literacy at the 1945 Census for all towns and settlements regardless of size, arranged alphabetically by districts.

The reports in this series represent final tabulated results from the Census of Population, Agriculture and Fisheries, taken by the Newfoundland Government in 1945. These tabulations have been carried out at the request of Newfoundland. Further reports are being released to show classifications of the population by occupations, industry, income, etc., as well as data relating to households and families, and summary compilations of the Census of Agriculture and Fisheries.
